

Genpak's vision for healthier-world involves sustainability and product stewardship.

The Harvest[®] Fiber line of plant-based industrial compostable foodservice packaging is made from annually renewable fibers. Each compostable food service container is carefully manufactured to our exact specifications which provides a functional and sustainable packaging solution. Our advancement of eco-friendly packaging has innovated the off-premises dining experience.

Harvest[®] Fiber containers perform well in the restaurant and on the go to maintain the quality of food required by consumers. The ribbed base design separates excess liquids to maintain airflow throughout the container. The robust stacking rims prevent unwanted sliding and collapsing during transport.

Harvest[®] Fiber Hinged Containers echo the sustainability sentiment that consumers value. Crafted from bagasse, a byproduct of sugarcane, our containers have a complete lifecycle that returns to the earth through composting* in commercially managed facilities.

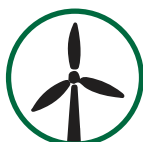

Harvest[®] Fiber containers are offered in a variety of sizes and designs, making them suitable for a range of applications, including quick service restaurants, fast food, takeout, delivery, and more. Elevate your off-premises dining operations with Harvest[®] Fiber products.

Stackable

Leak Resistant

Annually Renewable

Microwavable

Grease/Oil Resistant

STK#	DESCRIPTION	COLOR	CS/CT	Slv/Ct	Lbs/Cs	CUBE	MATERIAL	TI	HI
